SOFT SKILLS

PERSONAL PROJECTS

Brain Tumor Detection using CNN

- **GitHub Link:** https://github.com/DebajyotiTalukder2001/BrainTumorDetection_Using_CNN
- **Technologies used:** Python, Python libraries such as NumPy, TensorFlow, Keras, Matplotlib, and Streamlit
- Built a high-accuracy brain tumor detection system using TensorFlow and Streamlit, achieving an impressive success rate in predicting tumor presence from MRI images. Trained the TensorFlow model in the Google Colab environment, and average accuracy achieved by the system is up to 93%, leveraging a powerful convolutional neural network (CNN) architecture. Deployed the model using Streamlit and Google Colab Local Tunnel API, leveraging Streamlit's intuitive framework for rapid development and streamlined deployment

Traffic Monitoring System

- **GitHub Link:** <https://github.com/DebajyotiTalukder2001/Traffic-Monitoring-System>
- **Technologies used:** Python, Python libraries such as OpenCV, NumPy, Pandas, and Ultralytics YOLOv8
- This system can efficiently detect, track, and count vehicles moving in either direction and estimate the speed of the vehicles. It can also detect vehicle speed limit violations to ensure road traffic safety. Implemented the centroid tracking algorithm to track vehicles. The system was evaluated on the YOLOv8's state-of-the-art pretrained model. Tested on different videos, and average accuracy achieved by the system is up to 95%

E-Commerce Website

- **GitHub Link:** <https://github.com/DebajyotiTalukder2001/E-Commerce>
- **Technologies used:** HTML, CSS, JavaScript, jQuery, Bootstrap, PHP, MySQL
- Created a complete responsive E-Commerce website based on Nykaa-Fashion, which is one of the largest E-Commerce platforms for fashion and lifestyle in India. The website's features include admin panel, user registration, product listings, shopping cart, checkout, and order management
